

Task: Create a Login Screen using HTML and CSS based on the given design.

Step by Step Guide

1. HTML

1. Begin by structuring the tags as follows:

- `<main>` element.
- Inside `<main>`, create two `<div>` elements, one for the left side and one for the right side.
- Inside the left `<div>`, include an `` tag with the image sourced from the provided link.
- Inside the right `<div>`, include:
 - `<div>` for heading and paragraph
 - `<h1>` for the heading.
 - `<p>` for additional text.
 - `<form>` with two `<input>` elements for email and password.
 - Another `<p>` for additional text.

2. Assign appropriate classes and IDs to elements.

3. Use correct HTML tags for each element.

2. CSS

1. Import the Google Font 'Montserrat' with the specified weights.

```
@import url('https://fonts.googleapis.com/css2?  
family=Montserrat:ital,wght@0,100..900;1,100..900&display=swap');
```

2. Use the given CSS codes for background styling:

```
background: radial-gradient(50% 50% at 50% 50%, #FBBF24 0%, #F59E0B 100%); (For Left Div)  
background: radial-gradient(50% 50% at 50% 50%, #F8FAFC 0%, #F5F8FB 45.49%, #F1F5F9 100%);  
(For Right Div)
```

Submission Guidelines

1. Create a GitHub account if you don't have one.
2. Create a repository named "MERN MasterClass – Nerded".
3. Inside the repository, create six folders: Day 1, Day 2, Day 3, Day 4, Day 5, and Day 6.
4. Upload your code to the Day 1 folder with proper naming conventions.
5. Ensure that your HTML and CSS files are correctly linked.
6. Name your files appropriately (e.g., index.html and styles.css).
7. Organize your code logically and use proper indentation for readability.
8. Verify that your design matches the given design as closely as possible.
9. Capture a screenshot of your output in the browser displaying your login screen.
10. Save the screenshot image in the "Day 1" folder alongside your HTML and CSS files.
